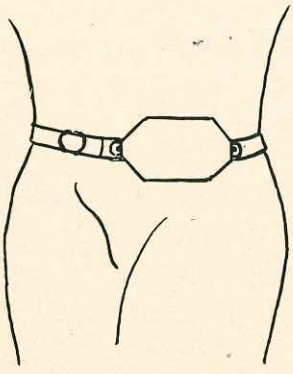
The washable envelope—functional part of plastic sheeting. A disposable, absorbent pad is easily slipped into position. Belt straps are adjustable to assure maximum comfort to wearer.

The **BC Belt** offers many advantages—(1) Patient can prepare own disposable pads at small cost. (2) The **B C Belt** offers maximum comfort—gone are the days of clumsy, cumbersome and compilcated devices.

The **BC Belt** was developed by a patient, who had first-hand knowledge of the problem, and has tried to develop a belt providing every possible convenience.

Applicable to post-operative patients who have established regular habits of elimination.



Attractive prices within reach of everyone

- Fabric may be washed in your washer.
- Plastic anchor need only be sponged.
- Do not use hot iron.

A few years ago I was operated on for cancer. The outcome was that I came home from the hospital with a Colostomy. I was faced with the problem of finding a comfortable, unrevealing device that I must wear the rest of my life. The ones on the market, available to similar post-operative patients, failed to meet with my approval in that they were too bulky.
I began an experiment that lasted two years and resulted in this simple colostomy belt.

The belt is simple in construction, easily laundered; a disposable pad of absorbent material and gauze; adjustable belt. Those who have examined it, including doctors and nurses are enthusiastic about it and have urged me to make it available to others.
